Journal of ALLOYS AND COMPOUNDS

Subject Index of Volume 247

Al doping
electrical properties of yttrium sesquisulfide (Y_2S_3) mechanically alloyed with copper, boron, and aluminum 9
Alloy films
pulsed laser ablation and deposition of Fe–V alloy on mild steel: SEM–EDS analysis 250
Al–Mg–Si
investigation of the Al–Mg–Si system by experiments and thermodynamic calculations 31
Al–Ni
thermodynamic assessment of the Al–Ni system 20
Aluminium
experimental investigation of the Mg–Al phase diagram from 47 to 63 at.% Al 57
aluminium compounds of the rare earths: enthalpies of formation of Yb-Al and La-Al alloys 141
Aluminium alloys
effect of intermetallic compounds on the activation of aluminium anodes 210
Amorphous alloys
enthalpies of formation of Ti–Cu intermetallic and amorphous phases 15
transformation kinetic equations for the study of non-equilibrium primary crystallization 93
Anodic behaviour
effect of intermetallic compounds on the activation of aluminium anodes 210
Antimony
reinvestigation of the binary Fe–Sb phase diagram 247
Association model calculations
calorimetric investigation of liquid aluminum–magnesium–zinc alloys 43
Automated very high temperature calorimetry
Co + Ga liquid system: enthalpy of formation 240

[Bi + Cd + Ga + In + Sn + Zn] system
thermodynamics of n-component systems ($n < 6$): calorimetric measurements and estimation of enthalpies of formation 180
Brewer–Engel theory
calculation of the thermodynamic effect of the Brewer–Engel generalized acid–base reactions of 1:1 intermetallics for non-transition metals Al and Mg with transition metals 1

Calorimetry
standard enthalpies of formation of some carbides, silicides, germanides and borides of holmium by high temperature direct synthesis calorimetry 52
thermodynamics of nickel–tin liquid alloys 82
thermodynamics of n-component systems ($n < 6$): calorimetric measurements and estimation of enthalpies of formation 180
Cluster variation method
configurational kinetics for disorder–$L1_2$ transition studied by the path probability method 98

[Co + Ga] system
Co + Ga liquid system: enthalpy of formation 240
Cobalt dibromide
vapour pressures and sublimation enthalpies of cobalt and nickel dibromides 202
Combustion synthesis
combustion synthesis of Zr–Al intermetallic compounds 190
n-Component alloys
thermodynamics of n-component systems ($n < 6$): calorimetric measurements and estimation of enthalpies of formation 180
Configurational kinetics
configurational kinetics for disorder–$L1_2$ transition studied by the path probability method 98
Contact materials
experimental study of ternary M–Zn–Se (M = W, Au, In, Ti) phase equilibria 158
Crystal structure
crystal and magnetic structure of the uranium digermanide UGe_2 104
Crystal structures
new phases in the thorium–iron–tin system: $ThFe_{0.22}Sn_2$ and $Th_4Fe_{13}Sn_5$ 109
Nd–Cu–Sn system: identification of ternary phases and partial determination of the isothermal section at 400 °C 148
the phase diagram of the Sc–Zn system 195
Crystallization enthalpies
enthalpies of formation of Ti–Cu intermetallic and amorphous phases 15
Crystallization kinetics
transformation kinetic equations for the study of non-equilibrium primary crystallization 93
Cu
on the thermodynamic stability and solid solution behavior of the phases τ_5-$Fe_2Al_{7.4}Si$ and τ_6-$Fe_2Al_9Si_2$ 154
Cu–Sn–Zn
thermodynamic properties of liquid Cu–Sn–Zn alloys 185

Dendrite growth
undercooling of Ni–B and Fe–B alloys and their metastable phase diagrams 164
Direction of magnetization
X-ray diffraction in magnetic fields 234

Electrical resistivity
electrical properties of yttrium sesquisulfide (Y_2S_3) mechanically alloyed with copper, boron, and aluminum 9
E.m.f. measurements
thermodynamic properties of liquid Cu–Sn–Zn alloys 185
Energy dispersive X-ray
pulsed laser ablation and deposition of Fe–V alloy on mild steel: SEM–EDS analysis 250
Enthalpies of formation
enthalpies of formation of Ti–Cu intermetallic and amorphous phases 15

Elsevier Science S.A.

Enthalpy
investigation of the Al–Mg–Si system by experiments and thermodynamic calculations 31
standard enthalpies of formation of some carbides, silicides, germanides and borides of holmium by high temperature direct synthesis calorimetry 52
Enthalpy of formation
on the thermodynamic stability and solid solution behavior of the phases τ_5-$Fe_2Al_{7.4}Si$ and τ_6-$Fe_2Al_9Si_2$ 154
thermodynamics of n-component systems ($n < 6$): calorimetric measurements and estimation of enthalpies of formation 180
Co + Ga liquid system: enthalpy of formation 240
Enthalpy of mixing
calorimetric investigation of liquid aluminum–magnesium–zinc alloys 43
γ–γ' equilibria
thermodynamic assessment of the Al–Ni system 20

τ_5-$Fe_2Al_{7.4}Si$
on the thermodynamic stability and solid solution behavior of the phases τ_5-$Fe_2Al_{7.4}Si$ and τ_6-$Fe_2Al_9Si_2$ 154
τ_6-$Fe_2Al_9Si_2$
on the thermodynamic stability and solid solution behavior of the phases τ_5-$Fe_2Al_{7.4}Si$ and τ_6-$Fe_2Al_9Si_2$ 154
Fe–B
undercooling of Ni–B and Fe–B alloys and their metastable phase diagrams 164
Fe–Cr–Mo–V–C
prediction of the lowest melting point eutectic in the Fe–Cr–Mo–V–C system 122
Fe–Sb phase diagram
reinvestigation of the binary Fe–Sb phase diagram 247
Fermi enthalpy
thermodynamics of nickel–tin liquid alloys 82
Co + Ga liquid system: enthalpy of formation 240
Formation enthalpy
aluminium compounds of the rare earths: enthalpies of formation of Yb-Al and La-Al alloys 141
kinetics of defect reaction in $Fe_{52}Al_{48}$ investigated by magnetothermal analysis 206

Generalized Lewis acid–base
calculation of the thermodynamic effect of the Brewer–Engel generalized acid–base reactions of 1:1 intermetallics for non-transition metals Al and Mg with transition metals 1
Gold alloys
the praseodymium–gold system 134

Hall coefficient
electrical properties of yttrium sesquisulfide (Y_2S_3) mechanically alloyed with copper, boron, and aluminum 9

Intermetallic compound
peculiarities of the interaction of the components in the systems of two rare earth metals and germanium 217
kinetics of defect reaction in $Fe_{52}Al_{48}$ investigated by magnetothermal analysis 206
Intermetallic compounds
enthalpies of formation of Ti–Cu intermetallic and amorphous phases 15
Nd–Cu–Sn system: identification of ternary phases and partial determination of the isothermal section at 400 °C 148
effect of intermetallic compounds on the activation of aluminium anodes 210
reinvestigation of the binary Fe–Sb phase diagram 247
Intermetallics
real time X-ray diffraction study of the formation by SHS of the phases γ' and H in the ternary system Al–Ni–Ti 72
combustion synthesis of Zr–Al intermetallic compounds 190
Internal friction
some aspects of the properties of NiTi shape memory alloy 115
Ionic bonding
calculation of the thermodynamic effect of the Brewer–Engel generalized acid–base reactions of 1:1 intermetallics for non-transition metals Al and Mg with transition metals 1
Ion nitriding
behaviour of sintered 410 low carbon steels towards ion nitriding 172
Iron
reinvestigation of the binary Fe–Sb phase diagram 247
Iron intermetallics
new phases in the thorium–iron–tin system: $ThFe_{0.22}Sn_2$ and $Th_4Fe_{13}Sn_5$ 109

Kinetic path
configurational kinetics for disorder–$L1_2$ transition studied by the path probability method 98
Kinetics
kinetics of defect reaction in $Fe_{52}Al_{48}$ investigated by magnetothermal analysis 206

La-Al alloys
aluminium compounds of the rare earths: enthalpies of formation of Yb-Al and La-Al alloys 141
Lanthanide alloys
standard enthalpies of formation of some carbides, silicides, germanides and borides of holmium by high temperature direct synthesis calorimetry 52
Lattice parameters
constitutional studies of the molybdenum–ruthenium–palladium ternary system 66
Limiting partial molar enthalpy
thermodynamics of nickel–tin liquid alloys 82
Liquid alloy
Co + Ga liquid system: enthalpy of formation 240
Liquid alloys
thermodynamic properties of liquid Cu–Sn–Zn alloys 185
Liquidus projection
prediction of the lowest melting point eutectic in the Fe–Cr–Mo–V–C system 122
Low melting eutectic
prediction of the lowest melting point eutectic in the Fe–Cr–Mo–V–C system 122

Magnesium
experimental investigation of the Mg–Al phase diagram from 47 to 63 at.% Al 57
Magnetic anisotropy
X-ray diffraction in magnetic fields 234

Magnetic structure
crystal and magnetic structure of the uranium digermanide UGe_2 104
Martensite phase
some aspects of the properties of NiTi shape memory alloy 115
Martensitic stainless steel
behaviour of sintered 410 low carbon steels towards ion nitriding 172
Metastable phase diagram
undercooling of Ni–B and Fe–B alloys and their metastable phase diagrams 164
Miedema's model
enthalpies of formation of Ti–Cu intermetallic and amorphous phases 15
Migration enthalpy
kinetics of defect reaction in $Fe_{52}Al_{48}$ investigated by magnetothermal analysis 206
Mn
on the thermodynamic stability and solid solution behavior of the phases τ_5-$Fe_2Al_{7.4}Si$ and τ_6-$Fe_2Al_9Si_2$ 154
Mo–Ru–Pd
constitutional studies of the molybdenum–ruthenium–palladium ternary system 66
Modified Born–Haber type cycle
calculation of the thermodynamic effect of the Brewer–Engel generalized acid–base reactions of 1:1 intermetallics for non-transition metals Al and Mg with transition metals 1
M–Zn–Se (M = W, Au, In, Ti)
experimental study of ternary M–Zn–Se (M = W, Au, In, Ti) phase equilibria 158

Ni–B
undercooling of Ni–B and Fe–B alloys and their metastable phase diagrams 164
Nickel dibromide
vapour pressures and sublimation enthalpies of cobalt and nickel dibromides 202
(Ni + Sn) alloys
thermodynamics of nickel–tin liquid alloys 82
NiTi
some aspects of the properties of NiTi shape memory alloy 115
Non-equilibrium crystallization
transformation kinetic equations for the study of non-equilibrium primary crystallization 93

Order–disorder transition
thermodynamic assessment of the Al–Ni system 20
Ordering kinetics
configurational kinetics for disorder–$L1_2$ transition studied by the path probability method 98

Path probability method
configurational kinetics for disorder–$L1_2$ transition studied by the path probability method 98
Phase diagram
investigation of the Al–Mg–Si system by experiments and thermodynamic calculations 31
thermodynamics of nickel–tin liquid alloys 82
Nd–Cu–Sn system: identification of ternary phases and partial determination of the isothermal section at 400 °C 148
the phase diagram of the Sc–Zn system 195
peculiarities of the interaction of the components in the systems of two rare earth metals and germanium 217
Phase equilibria
experimental investigation of the Mg–Al phase diagram from 47 to 63 at.% Al 57
constitutional studies of the molybdenum–ruthenium–palladium ternary system 66
the praseodymium–gold system 134
experimental study of ternary M–Zn–Se (M = W, Au, In, Ti) phase equilibria 158
phase equilibria of the quaternary system Ti–Al–Sn–N at 900 °C 198
Physical properties
peculiarities of the interaction of the components in the systems of two rare earth metals and germanium 217
PLAD
pulsed laser ablation and deposition of Fe–V alloy on mild steel: SEM–EDS analysis 250
Point defects
kinetics of defect reaction in $Fe_{52}Al_{48}$ investigated by magnetothermal analysis 206
Powder metallurgy
behaviour of sintered 410 low carbon steels towards ion nitriding 172
Properties
behaviour of sintered 410 low carbon steels towards ion nitriding 172

Rare earth alloys
the praseodymium–gold system 134
Real time X-ray diffraction
real time X-ray diffraction study of the formation by SHS of the phases γ' and H in the ternary system Al–Ni–Ti 72
Reorientation stress
some aspects of the properties of NiTi shape memory alloy 115
Retained austenite
on the thermodynamic stability of retained austenite in 4340 steel 128

Sb and SnSb structures
a new proposal for the binary (Sn,Sb) phase diagram and its thermodynamic properties based on a new e.m.f. study 223
(Sb,Sn) alloys
a new proposal for the binary (Sn,Sb) phase diagram and its thermodynamic properties based on a new e.m.f. study 223
Scandium alloys
the phase diagram of the Sc–Zn system 195
Scanning electron microscopy
pulsed laser ablation and deposition of Fe–V alloy on mild steel: SEM–EDS analysis 250
Self-propagating high-temperature synthesis
combustion synthesis of Zr–Al intermetallic compounds 190
Shape memory alloy
some aspects of the properties of NiTi shape memory alloy 115
SHS
real time X-ray diffraction study of the formation by SHS of the phases γ' and H in the ternary system Al–Ni–Ti 72
Sintered alloys
behaviour of sintered 410 low carbon steels towards ion nitriding 172

Solid solution
on the thermodynamic stability and solid solution behavior of the phases τ_5-$Fe_2Al_{7.4}Si$ and τ_6-$Fe_2Al_9Si_2$ 154
Solution calorimetry
enthalpies of formation of Ti–Cu intermetallic and amorphous phases 15
Spinodal ordering
configurational kinetics for disorder–$L1_2$ transition studied by the path probability method 98
Steel coating
pulsed laser ablation and deposition of Fe–V alloy on mild steel: SEM–EDS analysis 250
Sub-lattice model
thermodynamic assessment of the Al–Ni system 20
Sublimation enthalpy
vapour pressures and sublimation enthalpies of cobalt and nickel dibromides 202

Ternary compounds
on the thermodynamic stability and solid solution behavior of the phases τ_5-$Fe_2Al_{7.4}Si$ and τ_6-$Fe_2Al_9Si_2$ 154
Ternary systems
experimental study of ternary M–Zn–Se (M = W, Au, In, Ti) phase equilibria 158
Thermodynamic modelling
thermodynamic assessment of the Al–Ni system 20
Thermodynamic properties
thermodynamic properties of liquid Cu–Sn–Zn alloys 185
Thermodynamics
investigation of the Al–Mg–Si system by experiments and thermodynamic calculations 31
standard enthalpies of formation of some carbides, silicides, germanides and borides of holmium by high temperature direct synthesis calorimetry 52
thermodynamics of nickel–tin liquid alloys 82
Thermodynamics of binary (Sn,Sb)
a new proposal for the binary (Sn,Sb) phase diagram and its thermodynamic properties based on a new e.m.f. study 223
Thermodynamic stability
on the thermodynamic stability of retained austenite in 4340 steel 128
Thermoelectric power
electrical properties of yttrium sesquisulfide (Y_2S_3) mechanically alloyed with copper, boron, and aluminum 9
Thorium intermetallics
new phases in the thorium–iron–tin system: $ThFe_{0.22}Sn_2$ and $Th_4Fe_{13}Sn_5$ 109
Ti–Al–Sn–N system
phase equilibria of the quaternary system Ti–Al–Sn–N at 900 °C 198
Ti–Cu
enthalpies of formation of Ti–Cu intermetallic and amorphous phases 15
Ti–Sn–N system
phase equilibria of the quaternary system Ti–Al–Sn–N at 900 °C 198
Transformation plasticity
on the thermodynamic stability of retained austenite in 4340 steel 128
Transition metals
calculation of the thermodynamic effect of the Brewer–Engel generalized acid–base reactions of 1:1 intermetallics for non-transition metals Al and Mg with transition metals 1

Undercooling
undercooling of Ni–B and Fe–B alloys and their metastable phase diagrams 164
Univariant line projection
prediction of the lowest melting point eutectic in the Fe–Cr–Mo–V–C system 122
Uranium germanides
crystal and magnetic structure of the uranium digermanide UGe_2 104

Vapour pressure
vapour pressures and sublimation enthalpies of cobalt and nickel dibromides 202

X-ray diffraction
X-ray diffraction in magnetic fields 234

Y_2S_3-doped alloys
electrical properties of yttrium sesquisulfide (Y_2S_3) mechanically alloyed with copper, boron, and aluminum 9
Yb-Al alloys
aluminium compounds of the rare earths: enthalpies of formation of Yb-Al and La-Al alloys 141

Zinc alloys
the phase diagram of the Sc–Zn system 195
Zr–Al
combustion synthesis of Zr–Al intermetallic compounds 190
